

Offline Client for Microsoft® Dynamics NAV®

spec sheet

IT IS mobiligence opens an entire new world of possibilities. Most ERP users are aware of the challenge: working with integrated systems works fine, while the user is in the office. Whereas on the road or at your customers site, those users frequently feel the lack of access to these data or the possibility to generate new data directly while out of office.

Your sales/field representative will profit very much from a more portable ERP-solution on the Navision basis. Preparing quotes, accessing inventory - you name the benefits. Now this portable application is here with numerous possibilities. In addition, IT IS mobiligence incorporates business logic, that enables you to do all the regular calculations offline.

An overview of advantages and facts:

- Those business data updated from the Microsoft Dynamics® ERP system to IT IS mobiligence are always available - even without access to internet
- Easy, automated updates process enables a current data pool when abroad
- Assisted update process views and solves data changes
- Business logic support for calculation like on the ERP back end system
- Extremely customizable and extensible user interface and menu structure
- Data views and field attributes are easily customizable on a per-user basis

System requirements:

Microsoft Dynamics ERP environment

IT IS mobiligence can be run on systems meeting the following requirements:

- Microsoft Dynamics NAV Version 3.70B (Version 4.0 and later in Q2/2006) with
